Water-based varnish for residential use

Easy and comfortable

Home is a mono-component varnish, very easy to apply which grants the floor a soft and velvet aspect. It can be used both by professional installers and end customers for a residential use. The resistance against wear and household products is anyway very good.

With Home, the wood keeps its original color and natural appearance. The extra mat version gives an unfinished look to the floor like an open pore oil treatment.

Home is a water-based product, odorless, NMP free and with a low VOC content thus secure for users and with a low impact on environment.

To take care of a parquet varnished with Home is easy: for a frequent cleaning the use of the neutral soap Pulito Parquet is recommended and for periodical maintenance there exists a specific polish Lux.

Water-based mono-component varnish

- For residential use
- Easy to apply
- Good resistance to abrasion
- Quick drying time
- Available in semi-glossy, mat and extra mat version
- Low VOC and NMP free

A tip to have an easier application of the varnish when the weather is hot or on big surfaces: dilute Home with 5% of Rallenty.

Products with the Eco Friendly mark are made through extremely low environment impact production process, they do not contain dangerous compounds for human being and the environment and they guarantee the maximum yield: a responsible behavior for present and future.
